

Game designer focused on rapid prototyping and UX, I am currently pursuing a bachelor's degree in video game design. Driven by curiosity, I am always looking for new challenges and opportunities to deepen my knowledge. I have experience with Unity (versions 2021–2023 and 6), Unreal Engine 5 (Blueprints), C#, and JavaScript. I am proficient with several productivity tools (Notion, Miro, Fibery) and creative tools, including Adobe Creative Cloud. I aim to create meaningful, fluid, and accessible game experiences for everyone.

Relevant Experience

Independent Steam Game Development (Minimal RPG)

Montréal/Gatineau, Quebec

October 2024 – Present

- Design and develop a complete video game independently, from systems design through final integration
- Program gameplay mechanics, UI systems, and core features using Unity and C#
- Design and integrate a user interface focused on readability, navigation, and user experience
- Maintain consistency across systems, progression, and the overall player experience through multiple phases of iteration and prototyping
- Develop and maintain the project's technical architecture and create tools to support development

Ubisoft Game Lab Competition

Montréal, Quebec

January 2026 – April 2026

- Develop core character mechanics and abilities in Unreal Engine 5 using Blueprints
- Contribute to rapid prototyping and iteration of gameplay and the overall flow in collaboration with a multidisciplinary team
- Design and integrate the game's user interface in collaboration with the UI artist, with a focus on the user's navigation experience
- Recipient of the **Best Game Design award**; nominated for Best Prototype, Best Integration of the Theme, and Best Artistic Direction

Volunteer – Programming Classes

Montréal, Quebec

November 2023

- Develop a curriculum for high school students.
- Ensure each student understands the material despite varying skill levels.
- Improve my communication.

Work Experience

Government of Canada – Office of the Commissioner of Official Languages

Gatineau, Quebec

Webmaster Assistant

May 2024 – June 2025

- Integrate and format digital content using HTML and web content management systems while complying with Government of Canada accessibility standards
- Prepare social media posts, visuals, and animations
- Contribute to improvements in navigation and user experience by designing wireframes and prototypes in Figma
- Collaborate with different teams to ensure consistency across digital content and the user experience
- Analyze social media performance and trends to support content publishing decisions

City of Gatineau

Gatineau, Quebec

Day Camp Counsellor

Summer 2023

- Lead and supervise groups of youth in a dynamic and structured environment
- Collaborate with parents, counsellors, and the coordination team to ensure activities ran smoothly
- Recipient of the Rookie of the Year award

Unigym Gatineau

Gatineau, Quebec

Coach and Day Camp Counsellor (2022)

2021 – 2023

- Plan and structure adapted training sessions to ensure consistent and engaging progress for youth
- Design and organize day camp activities several weeks in advance while considering participant experience and logistics
- Adapt activities and facilitation methods based on group needs, skill levels, and engagement
- Supervise groups of youth in a dynamic environment requiring communication, problem-solving, and quick decision-making
- Collaborate with parents and the team to ensure a positive experience and effective follow-up for participants

Education

Université du Québec en Abitibi-Témiscamingue

Cambridge, MA

Bachelor's Degree in Video Game Creation – Design Concentration

2025 – Present

Cégep de l'Outaouais

Gatineau, Canada

Technical Program in Multimedia Integration

2023 – 2025

Collège Saint-Alexandre de la Gatineau

Gatineau, Canada

Student of the Year Award (2022), Ethics Award (2023), and English Award (2023)

2023

Skills and Interests

- **Game Engines:** Unreal Engine 5, Unity
- **Design preference:** Tech, UX and Systems.
- **Programming and Integration:** Blueprint, C#, HTML, JavaScript
- **UX/UI and Prototyping:** Figma, wireframing, UX prototyping, UI integration (Unity, UE, and Godot)
- **Production and Collaboration Tools:** Notion, Miro, Fibery, Agile and Scrum methodologies
- **Digital Creation:** Adobe Creative Cloud and Canva
- **Version Control:** Git, Perforce
- **Office Software:** Microsoft Office Suite and Google tools
- **Languages:** Bilingual French/English
- **Other Interests:** Outdoors, running, video games, board games, cooking
